CV

Cover Letter

Application for Front-End Web Developer Position

Ladies and Gentlemen,

I am writing to express my interest in the Front-End Web Developer position. With a strong interest in web technologies, a passion for clean and user-friendly design, and experience in both logistics and technical roles, I am eager to bring my skills to your team.

During my Frontend Soft (2024) program, I developed a strong foundation in HTML5, CSS3, JavaScript, and frameworks like React.js. I have built projects using SASS, Bootstrap, Material-UI, Node.js, Git and databases such as SQL and MongoDB as part of my personal „Portfolio“ and showcased work. My technical expertise allows me to build responsive, modern web applications that enhance user experience.

In my previous roles, I have demonstrated adaptability and teamwork, whether working as an associate at DPD warehouse, where I also handled Office tasks related to damaged or ruined packages. This involved creating specific protocols, using computer programs to process forms, and ensuring accurate documentation. Additionally, I worked with dangerous goods that required careful handling strict compliance with safety regulations, or as an auto mechanic, where teamwork and communication was essential as we removed engines for repairs and reinstalled them back into the cars. These experiences have helped me develop problem-solving skills, attention to detail, and the ability to work in fast-paced environments—traits that are equally valuable in web development.

I am fluent in English, German (B2) which allows me to collaborate effectively in diverse work environments. Additionally, my knowledge of 3D modeling (Blender) gives me a unique creative perspective that can be applied to UI/UX development.

I am excited about the opportunity to contribute my technical skills and creativity. I would welcome the chance to discuss how my skills align with your needs. Please feel free to contact me at your convenience to schedule an interview.

Thank you for your time and consideration. I look forward to your response.

Best regards,

Antanas Varanauskas
